Expert views about National Institute of Technology Hamirpur

Event's Name/Expert Lecture and Dates	Expert Photograph	Expert's views about the Institute
1. DST Sponsored SERC School on Nano Optics organised at NIT Hamirpur during Sept.13 – Oct. 01, 2010 2. One day Workshop on "Reimagining Education in the Light of NEP- 2020" in view of the implementation of National Education Policy 2020 organised on April 20, 2023.		Since 2008, I have interacted with NIT Hamirpur's professors, students, and administration in a variety of ways, including as an invited speaker at various conferences, a member of the faculty selection committee, a Ph.D. thesis examiner, and research collaborator. I was so inspired by its vibrant academic culture that I decided to co-organize a DST-sponsored SERC school on nano-optics as school director on its campus in 2010. I've also co-supervised two of its Ph. D. students. I've therefore witnessed its continual pursuit of perfection. This course has greatly impressed me with its very dedicated instructors, smart and inquiring students, and administration who are highly encouraging and supportive of academic interests. I am convinced that with these assets, NIT Hamirpur will continue to play an increasingly important role in national development.
Organising Department/Centre/Section/ Society: Department of Physics & Photonics Science, NIT Hamirpur and IIT Bombay/Indian Association of Physics Teachers	**Expert Name:** Prof. B. P. Singh	
Co-ordinator/Organising Secretary: Dr. Kuldeep Kumar Sharma	**Designation and Affiliation:** Former Professor, Department of Physics, IIT Bombay.
