## About the e-STC

The process of quality research is useful if it sees the dawn of publication. Hence, getting a paper published in a reputable journal is an important milestone for researchers. Publication must be seen as an important, if not the most important, part of quality research process. However, writing research papers for academic journals is not easy and is also very competitive. This short-term course is an attempt to address the issues related to writing and communicating research papers. The short-term course aims to train the participants about the systematic process involved in converting a particular research work into a publishable manuscript, which can be communicated to a reputed journal for publication. The short-term course aims to enable the participating researchers and scholars to plan and prepare research publications suitable for world recognized journals (**SSCI/AHCI/Scopus with High Impact Factor**). Hands-on experience will be provided on important components of a research paper. Many important tips would be shared to deliver the content smartly in shorter as well as longer run in career as a researcher and academician. Content of the short-term course has been designed to avoid some pitfalls in publication journey and become ready as a skillful researcher and author to match expectations of quality publications. The short-term course would be useful for the professional development of faculties, trainers, researchers, and professionals.

## Objectives of the e-STC

- To familiarize the participants with the general structure and elements of a research article
- To deal with the issues and challenges of preparing and writing a research manuscript suitable for publication in **SSCI/ AHCI/Scopus indexed journals**
- To understand the review process and to accommodate reviewers' perspective leading to successful publication.
